

Satellite Addendum

Landlord discourages the use of satellite dishes. If you feel it is absolutely necessary to have a dish, you must get prior written permission from Landlord and instructions on how and where to install the satellite dish. If Tenant installs a satellite dish without obtaining prior written permission, Landlord will be forced to have it removed and Tenant will be responsible for the cost to remove the dish and will be charged for any damage done to the Premises.

I have read and understand this Addendum.
